Vision, Mission & Values

Vision

To establish Al-Tarasuf as a premier regional provider of integrated technical, industrial, and oilfield services, recognized for operational reliability, safety excellence, and technical proficiency across the energy and industrial sectors.

Mission

Al-Tarasuf is committed to delivering safe, efficient, and technically robust solutions that support and meet the operational requirements of oil & gas operators, energy producers, and industrial facilities.

We achieve this mission through :

- Strategic deployment of qualified technical personnel and engineering expertise
- Execution of specialized inspection, maintenance, fabrication, and rotating equipment services in conjunction with energy solutions
- Operation under internationally recognized management systems
- Continuous investment in technical, workforce competency, and operational efficiency.
- Building long-term partnerships founded on integrity, reliability, and performance.

Vision, Mission & Values

Core Values

- Safety First

The protection of people, assets, and the environment is our highest priority. All operations are executed under structured HSE management systems.

- Uncompromising Quality

The protection of people, assets, and the environment is our highest priority. All operations are executed under structured HSE management systems.

- Integrity & Accountability

We maintain total transparency and assume full responsibility for every commitment we make.

- Technical Excellence

Our organizational strength is built upon skilled personnel, disciplined systems, and proven technical execution.

- Continuous Improvement

We continually improve our services, systems, and operational performance.

Company Overview

Company Overview

Al-Tarasuf is a multi-disciplinary industrial service provider supporting the oil & gas, energy, petrochemical, and manufacturing sectors with integrated technical solutions.

Our service portfolio integrates engineering expertise, skilled manpower, inspection services, rotating equipment maintenance, fabrication, procurement, and renewable energy solutions.

We support clients throughout the entire lifecycle of industrial assets, including:

- Installation and commissioning support
- Preventive maintenance and inspection
- Equipment repair and refurbishment
- Operational support services
- Infrastructure and energy solutions

Our operations are structured around internationally recognized management systems to ensure:

- Consistent service delivery
- Technical reliability and traceability
- Environmental responsibility
- Occupational health and safety compliance

Industries Served

Industries Served

Al-Tarasuf supports a wide range of sectors including:

- Oil & Gas Operations
- Upstream, midstream, and downstream facilities
- Drilling & Well Services
- Power Generation & Utilities
- Petrochemical & Process Industries
- Industrial Manufacturing
- Civil Infrastructure & Construction Projects

The teams at Al-Tarasuf have extensive experience in managing high-risk industrial environments and challenging operational conditions.

Core Service Capabilities

Technical Manpower Supply

Al-Tarasuf provides qualified technical personnel to support oilfield operations, industrial projects, and maintenance activities.

Personnel categories include:

- Engineers and project supervisors
- QA/QC inspectors
- Certified welders and fabrication personnel
- Mechanical and electrical technicians
- Oilfield support personnel
- HSE-trained workforce deployment

All personnel are deployed under strict competency verification and safety compliance procedures.

Core Service Capabilities

Inspection & QA / QC Services

Al-Tarasuf provides comprehensive inspection and quality assurance to ensure equipment, materials, and operational activities meet project specifications and regulatory requirements.

- Services include : Visual and dimensional inspection, QA/QC surveillance, third-party coordination, oilfield equipment verification and material traceability verification.
- Output : Accurate, reliable, and traceable quality documentation and compliance reporting.

Our inspection services ensure accurate, reliable, and traceable quality verification.

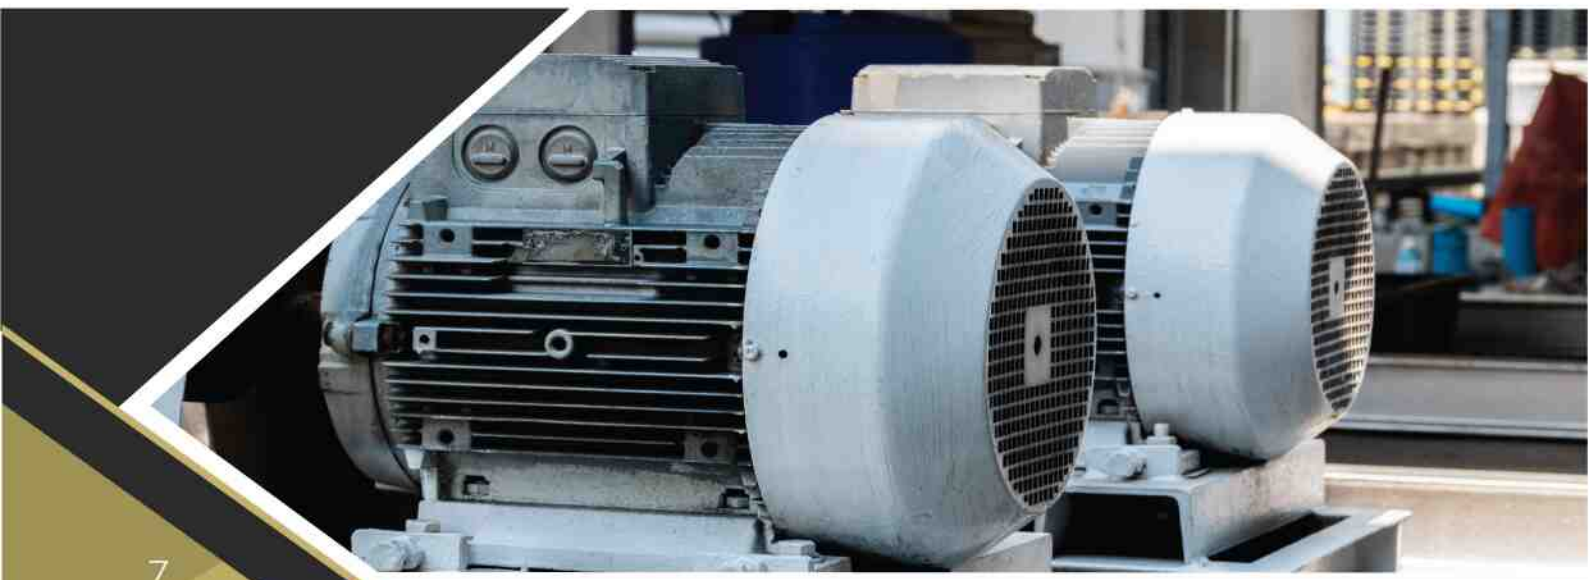

Core Service Capabilities

Electric Motor, Generator and Rewinding Services

Al-Tarasuf Company provides specialized maintenance, repair, and rewinding services for rotating electrical assets (electric motors and generators) used in industrial and power operations , Our services include:

- Rewinding of Low and Medium Voltage (LV & MV) motors.
- Refurbishment and maintenance of generators.
- Electrical testing and performance verification.
- Preventative maintenance programs.
- Advanced fault diagnosis.

Our services help clients restore equipment performance, extend operational life, and reduce unplanned downtime.

Core Service Capabilities

Rotating Equipment Repair & Dynamic Balancing

Al-Tarasuf provides specialized services for equipment maintenance and performance optimization of high-speed rotating components.

- Capabilities include: Maintenance and single and two-plane dynamic balancing for rotors (pumps, compressors, generators), impellers, and fans.
- Diagnostics: Vibration analysis and root cause fault diagnosis to mitigate premature mechanical failure.

Tank Cleaning & Tank Inspection Services

Al-Tarasuf provides industrial tank cleaning and inspection services for oil storage tanks, fuel tanks, and process tanks.

- Services: Crude oil and fuel tank cleaning, industrial tank cleaning and sludge removal, preparation of tanks for maintenance and repair, and confined space tank cleaning operations.
- Inspection: Internal condition assessment and external corrosion monitoring under strict safety procedures and environmental protection controls.

Core Service Capabilities

Welding and Fabrication Services

Al-Tarasuf provides industrial welding and fabrication services supporting maintenance and construction activities.

- Capabilities include : Structural steel and process piping fabrication, equipment repair, workshop fabrication services and on-site welding support.
- Standards: All activities are executed under approved Welding Procedure Specifications (WPS) by qualified welders.

Logistics and Industrial Procurement

Al-Tarasuf supports clients through equipment sourcing, procurement, and logistics coordination.

- Services include : Industrial equipment sourcing, Oilfield tools and consumables supply, Spare parts procurement , Vendor qualification and coordination, Equipment transportation and mobilization
- Systems: Our procurement workflows ensure quality verification, traceability, and timely delivery.

Core Service Capabilities

Solar & Renewable Energy Solutions

Al-Tarasuf provides comprehensive renewable energy and solar power solutions tailored to industrial facilities, infrastructure projects, and off-grid remote operations.

Services include:

- Solar photovoltaic (PV) system design and installation
- Industrial and commercial rooftop solar systems
- Ground-mounted solar installations
- Hybrid solar-diesel power systems for remote sites
- Battery energy storage system integration
- Operations & Maintenance (O&M)
- Energy efficiency consulting

Renewable energy systems help clients reduce operating costs, improve energy reliability, and reduce environmental impact.

Core Service Capabilities

Engineering and Technical Support Services

Al-Tarasuf provides high-level engineering consultancy and operational support services designed to maximize asset availability and process safety.

Services include :

- Mechanical engineering consultancy
- Maintenance planning and supervision
- Technical documentation review
- Advanced field troubleshooting & diagnostics
- Equipment performance optimization

These services support clients in maintaining efficient, safe, and reliable operations.

Management System

Integrated Management System

Al-Tarasuf operates under a structured Integrated Management System (IMS) aligned with internationally recognized standards.

These systems ensure:

- Consistent quality delivery
- Environmental responsibility
- Occupational health and safety compliance
- Traceability and documentation control

ISO 9001 – Quality Management System

Our QMS is based on:

- Risk-based thinking
- Documented procedures and process control
- Inspection and Test Plans (ITPs)
- Material traceability and document control
- Corrective and preventive actions
- Internal audits and management reviews

Management System

ISO 14001 - Environmental Management System

Environmental management includes :

- Environmental impact monitoring
- Waste management and pollution prevention
- Resource efficiency initiatives
- Compliance with environmental regulations

ISO 45001 - Occupational Health and Safety

Our safety management includes:

- Hazard identification and risk assessment
- Job Safety Analysis (JSA)
- Workforce training and competency verification
- Incident investigation and reporting
- Emergency preparedness planning

We maintain a strong zero-harm safety culture across all operations.

ISO CERTIFICATIONS

ISO 17020 - Inspection Body Operations

- Independent inspection procedures
- Competent inspection personnel
- Calibration-controlled inspection equipment
- Traceable documentation and reporting

ISO 17025 - Testing & Calibration Practices

- Controlled testing procedures
- Measurement traceability
- Quality assurance of test results

Information Security Management - ISO 27001

Al-Tarasuf is proud to operate under the ISO/IEC 27001:2022 Information Security Management System (ISMS). This international accreditation confirms that our internal processes for handling sensitive project data, engineering schematics, and client communications meet the most rigorous global security standards.

API & Oilfields Standards

API & Oilfield Standards Compliance

Al-Tarasuf provides specialized support to oilfield operators and EPC through rigorous adherence to API standards and industry best practices.

Key Compliance Pillars :

- Welding under qualified WPS and PQR procedures
- Welding compliance with API standards such as API 1104 where applicable
- Material traceability and heat number verification
- Inspection documentation control
- QA/QC records retention
- Compliance with project specifications

HSE Commitment & Operational Excellence

HSE Commitment & Operational Excellence

Health, safety, and quality, alongside operational integrity, underpin Al-Tarasuf's operations. We are committed to the belief that technical success cannot be separated from the safety of our personnel and the safeguarding of the environment.

Our Core Commitments:

- Operational reliability
- Regulatory compliance
- Skilled workforce development
- Continuous operational improvement
- Long-term client partnerships

Through disciplined execution and technical expertise, Al-Tarasuf delivers reliable industrial and oilfield solutions. We remain steadfast in maintaining the highest standards of safety, environmental stewardship, and professional excellence in every project we undertake
